To Whom It May Concern:

It is with great enthusiasm that I provide an updated letter of recommendation for PA Hina Mazharuddin, who continues to serve as a valued guest lecturer in our Physician Assistant program. PA Mazharuddin is an outstanding educator and mentor, and her contributions to our curriculum remain both meaningful and highly appreciated.

PA Mazharuddin's lecture is delivered within our **Professional Aspects of Health Care** course, which is designed to introduce students to the many roles physician assistants may pursue beyond direct patient care, including leadership, education, and evolving areas of healthcare practice. This course occurs during the second year of our program, immediately before students transition into their clinical rotations, making it an especially important time for students to broaden their understanding of the profession and the diverse ways they can contribute to healthcare systems. PA Mazharuddin consistently demonstrates a strong commitment to engaging students through thoughtful and interactive teaching methods. Her sessions are intentionally designed to promote critical thinking and clinical reasoning, and she incorporates pre-lecture activities that encourage active participation and allow students to arrive prepared, maximizing the effectiveness of their classroom experience.
